

SANJIB GHARA

ROL NO: -BTECH/CSE/23/065

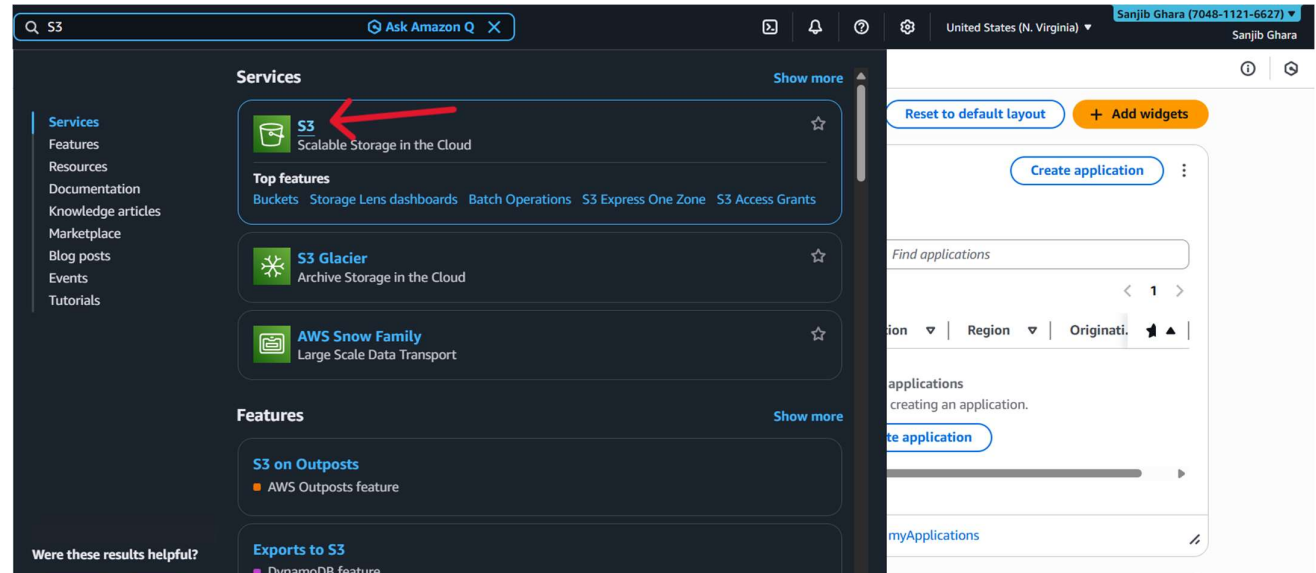

Assignment No: -6

Upload a static website on S3.

Steps: -----

STEP-1: At first, we need to login the AWS console.

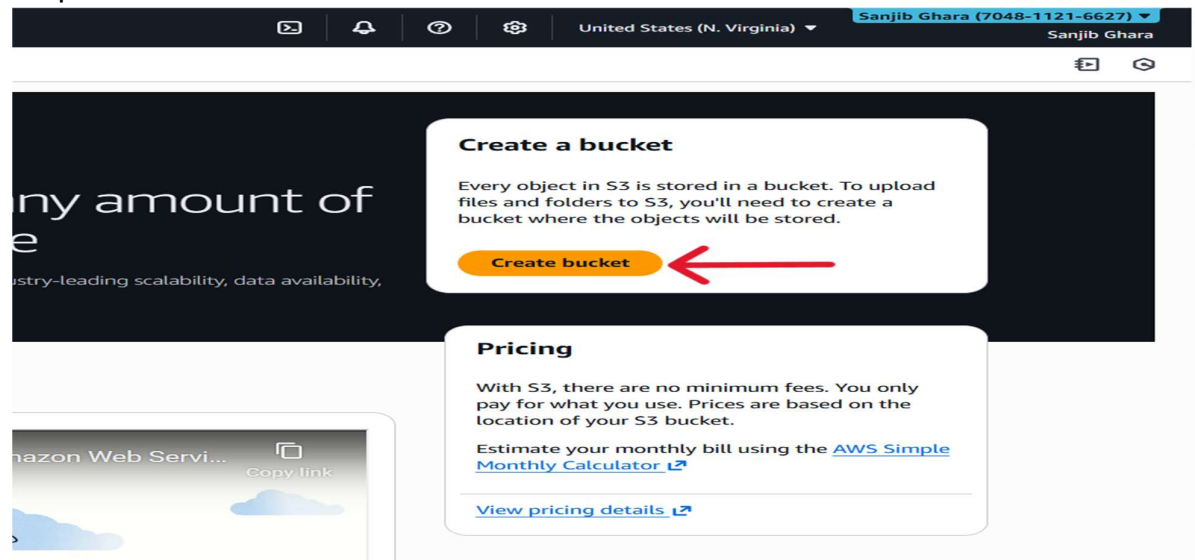

STEP-2: Then search s3 in the search bar.

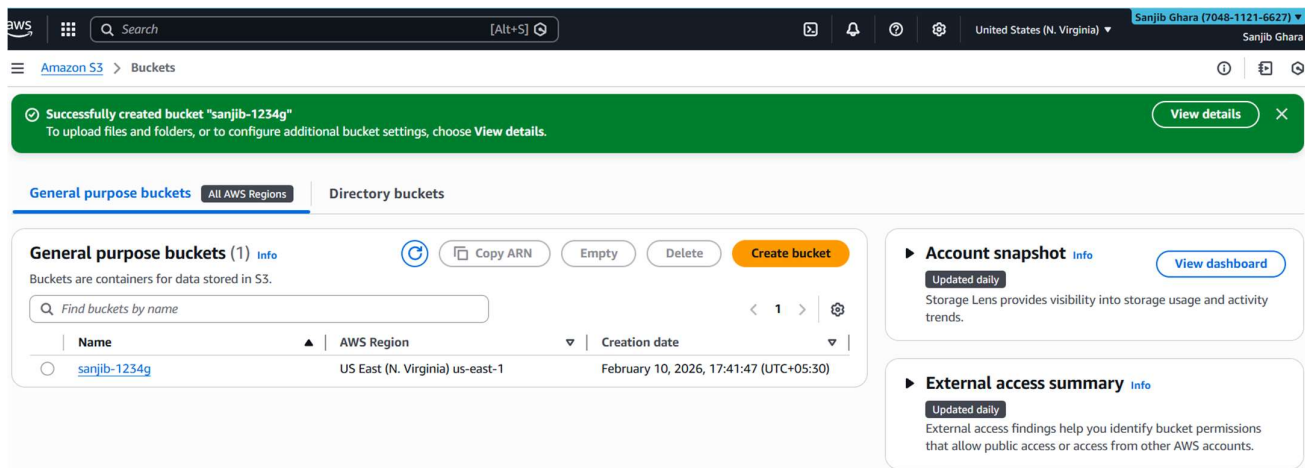

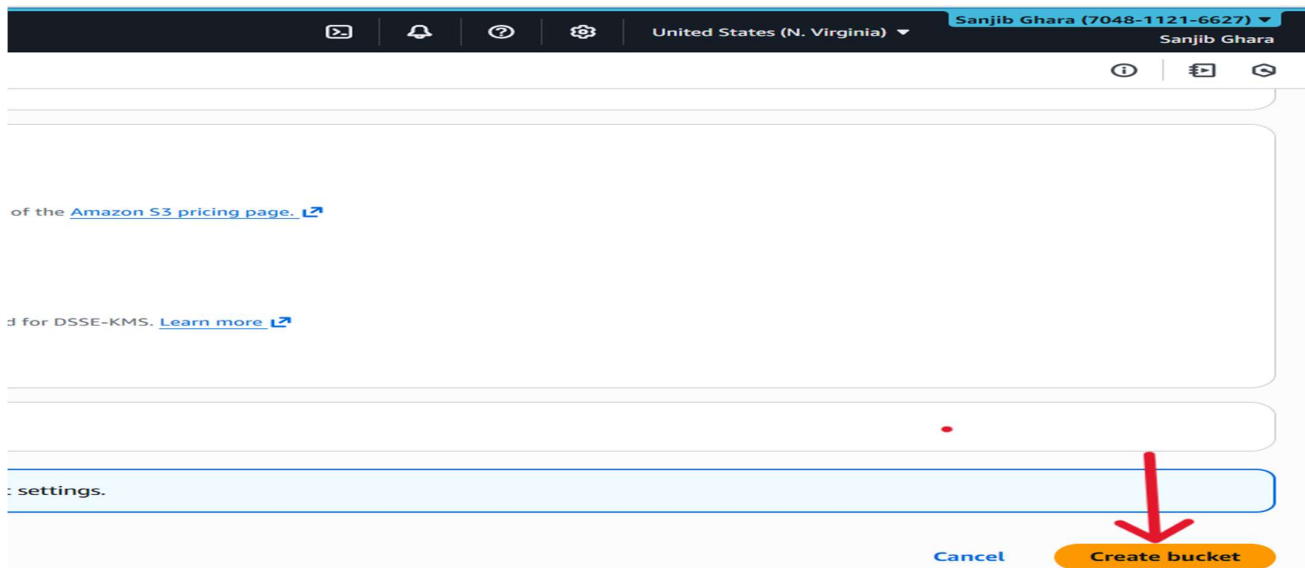

STEP-3: After that click on the s3 service.

STEP-4: Now we redirect to the s3 dashboard.

Step-5: click on create bucket

STEP-6: After click on create bucket, we redirect to the create bucket interface. In this interface the bucket type will be “General purpose”, and give the bucket name.

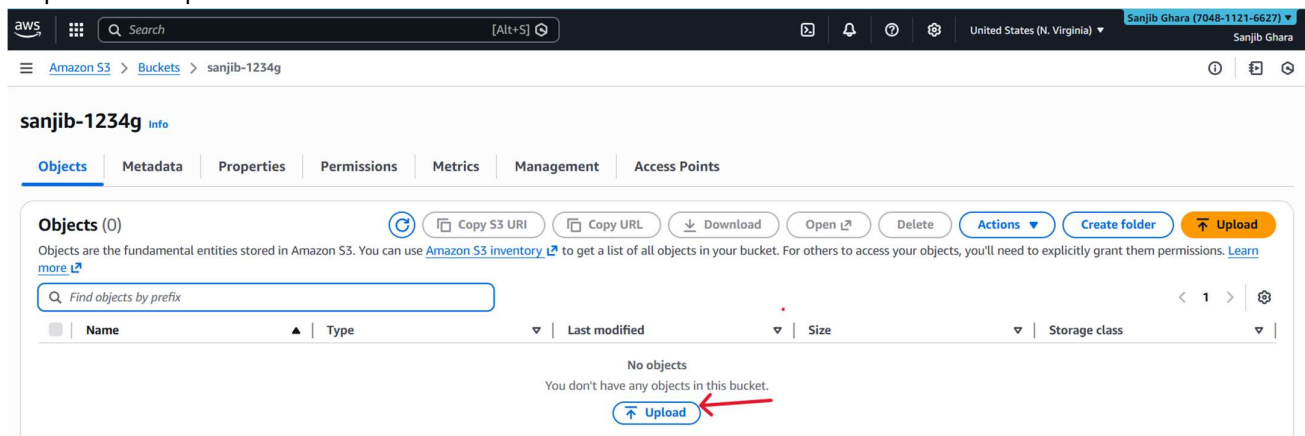

STEP-12: After that click on upload option.

STEP-13: IN upload interface click on Add files.

STEP-14: we take 3 files from our device name as "index.html, home.html, next.html" and upload it.

STEP-15: After that select the file and give permission for access it.

Step-16: Then upload the all selected files.

Upload

Upload the files and folders you want to upload to S3. To upload a file larger than 160GB, use the AWS CLI, AWS SDKs or Amazon S3 REST API. [Learn more](#)

Drag and drop files and folders you want to upload here, or choose **Add files** or **Add folder**.

Steps-17: Then we need to go to the bucket properties

Steps-18: -Then scroll up the interface and go to the bottom side where need to edit the “static website Hosting”.

Steps-19: -then enable the static website hosting.

Steps-20: after that give specify home page name.

Steps-21: After that click on save changes

Steps-22: then copy the URL from bottom under properties, and check it in new window.

The image displays three sequential screenshots of the AWS S3 console interface, illustrating the steps to configure static website hosting for a bucket named 'sanjib-1234g'.

Top Screenshot: Shows the 'sanjib-1234g' bucket overview. The 'Properties' tab is selected and circled in red. The 'Bucket overview' section displays the AWS Region (US East (N. Virginia) us-east-1), Amazon Resource Name (ARN) (arn:aws:s3:::sanjib-1234g), and Creation date (February 10, 2026, 17:41:47 (UTC+05:30)). The 'Bucket Versioning' section shows it is disabled. The 'Multi-factor authentication (MFA) delete' section also shows it is disabled.

Middle Screenshot: Shows the 'Static website hosting' configuration page. The 'Edit' button is circled in red. The page includes a recommendation to use AWS Amplify Hosting and a 'Create Amplify app' button. The 'S3 static website hosting' section shows it is disabled.

Bottom Screenshot: Shows the 'Static website hosting' configuration page with the 'Enable' radio button selected and circled in red. The 'Hosting type' section shows 'Host a static website' is selected. The 'Index document' field is circled in red and contains the value 'index.html'. The 'Error document' field is also visible.
